The applicant proposes to repair an existing crib dock and an existing wall in-kind, install one three-pole ice cluster, install 300 SF seasonal canopy adjacent to dock.

***Referencing the Gisela Velez and Steven Brusie Standard Dredge & Fill application, the Wolfeboro Conservation Commission questioned the impact of the seasonal canopy on the view of the abutters. We noted that the abutters have been properly noticed and would have had 75 days to respond if there was an objection on their part. The Commission does not have an objection to the project otherwise.***
