Review Master Plan, Energy Chapter Goals

Review Mission Statement: The mission of the Wolfeboro Energy Committee is to identify opportunities for the town of Wolfeboro and its residents to save energy and reduce greenhouse gas (GHG) emissions; and to work to assure that cost-effective energy efficiency practices and GHG reduction strategies are implemented town-wide. The committee aims to assist the town in addressing these goals as approved by the voters in the Town Meeting warrant article in March of 2007. The committee will make recommendations to and cooperate and communicate with town officials, boards and commissions as well as public and private groups with similar concerns, and with the appropriate agencies of the state, regional, and federal governments.
