

PUBLIC NOTICE

Environmental Review of Clean Water State Revolving Fund Project
Town of Wolfeboro, NH – Rapid Infiltration Basin (RIB) Site Remediation
D2019-0807

The proposed project includes the following:

General project area:

- Demolition of:
 - Above-ground PVC pipe to the existing Central Flow Control Structure
 - Pilot 3 manhole structure and artificial riverbed
 - A portion of the PVC distribution piping to existing Pilot 3
- Installation of:
 - Four (4) Engineered Natural Solution (ENS) systems along Nineteen Mile Brook
 - A concrete Western Flow Control Structure
 - 4-inch PVC distribution piping from the new flow control structure to each ENS system
- Temporary and permanent stormwater and erosion control measures

Central Seep:

- Demolition of the existing perforated manhole.
- Installation of:
 - One Level Control Manhole (No. 1)
 - Two Cut-off Trenches (Nos. 4 and 5)
 - Blanket drain consisting of Roadrain 7 geotextile (or equivalent)
 - Blanket drain consisting of stone and geotextile
- Provide structural fill in area to bring final grade to a 3:1 slope; add topsoil and plant waddles
- Wetlands restoration measures

Western Seep:

- Installation of:
 - One Sump Manhole (No. 2)
 - One Weir Manhole (No. 3)
 - One Level Control Manhole (No. 2)
 - Two Cut-off Trenches (Nos. 6 and 7)
 - Drainage blanket consisting of stone and geotextile
- Provide structural fill in area to bring final grade to a 5.5:1 slope; add topsoil and plant waddles
- Wetlands restoration measures

Temporary impact areas are estimated to be 53,000 sf and permanent impact areas are estimated to be 400 SF. The total cost of the project is estimated at \$3,500,00.00 and is anticipated to be funded through the Clean Water State Revolving Fund loan. A wetlands permit and Remediation General Permit is required. A Finding of No Significant Impact (FONSI) is proposed.
